Social Credit Landslide With Record Vote

The election last week proved not only a landslide for the Social Credit party, but also showed a record vote in the province.

The total votes polled in the province were 298,330. This compared with a total of 182,219 in 1930.

Of the total votes polled the Social Credit candidates garnered 161,527, taking them away from the U.F.A., Conservatives, Labor and Independents, all these parties showing big decreases over the votes polled for them in 1930. The Liberal party candidates polled an increased vote, jumping from 46,275 in 1930 to 69,242 in 1935, an increase of 22,967.

In the 1930 elections the U.F.A. polled 74,187 votes, but in 1935 this dropped to 30,551, a decrease of 43,636.

The Social Credit have definitely elected 49 and are leading in the seven constituencies still to be decided. The Liberals have elected five candidates, 3 in Edmonton and one each at Calgary and Grouard. The Conservatives have elected only two, one each in Calgary and Edmonton, while Premier Reid and all his U.F.A. candidates were defeated.

In the election the Liberals had 61 candidates; the U.F.A. 45; Conservatives 39; Labor 10 and Independents 7. Communists had 10 nominees.

E. L. Gray, Deputy Minister of Municipal affairs for the Alberta government, has resigned to accept the position of manager of the new Eastern Irrigation District, formerly operated by the C.P.R., east of Calgary, with headquarters at Brooks. Mr. Gray has been an official of the Alberta government for some years, being originally with the department of Agriculture.

Hill Billies Advance in Second Round of Softball Playoff

Didsbury Hill Billies advanced in the second round of the provincial intermediate softball playoffs by defeating Calgary Velvets in both ends of a doubleheader at Didsbury on Saturday, the scores being 11-10 and 3-2. The Velvets had previously won the first game of the series at Calgary by a 6-2 score.

After Calgary had scored once in the first inning the local crew went right out to win the ball game at once and skipped four runs over the pan in their half of the first frame. One more in the second and another in the third made the score 6-2 for Didsbury and it looked like an easy win for the locals. However, the Velvets came to life in the next three innings to score seven times and take the lead. The Hill Billies fought right back with a barrage of hits in the eighth that netted them three runs and the victory. The game was loosely played, 11 errors being chalked up, 7 to Calgary and 4 to Didsbury. Holub went the route for Didsbury and did not display his usual form. He issued 6 walks, but offset this by fanning 7 Velvet slingers. Styura of Calgary walked 4 and fanned 4.

The second game, one of the fastest games ever played here, was featured by the brilliant fielding of Tuggle, Honey and Berscht in the local outfield. Time after time these players made spectacular catches to rob the visitors of what looked like sure hits. Holub performed the iron man stunt by again going the route and limiting the Velvets to two hits, while his mates were garnering ten from the offerings of Keyte of Calgary. The locals contributed 5 errors to 4 by Calgary. Velvets were much faster on the bases, but failure to hit in the pinches proved their downfall.

Didsbury. Honey cf; Krebs 2b; Tuggle 1f; Berscht rf; F. Evans 3b; E. Evans ss; R. Gulliver 1b; Geske c; Holub p.

Calgary. Olson cf; Hawkins ss; Alexander c; Knickerbocker 3b; Keyte p; Novicki 2b; Forbes 1b; Garrick rf.

Umpires. Wyman, Didsbury; Hornby, Calgary.

The Calgary Velvets have protested the evening game on the grounds that a boy spectator obstructed the ball in one of the plays. The result is still in the hands of the committee.

A Changed Wheat Picture

Six weeks ago the world wheat situation looked black. When the Canadian grain marketing bill was under discussion at Ottawa the general gloom was so thick it could almost have been cut in chunks. Prophets of doom were airing their views on every hand. Canada's big wheat carryover, they said, threatened to bankrupt the country in view of a prospective big crop in North America and good crops in Europe and Russia.

The events of the past few weeks have changed the picture completely, and Canada has probably escaped a Rust devastation in the United States quarter of billion bushels from the estimated yield in July. The United States will not have a surplus in her 1935 wheat production. Canada will once again have a below average crop.

School Opens Next Tuesday

The summer school vacation is drawing to a close and the schools will open on Tuesday next.

During the holidays workmen have been busy making improvements at the School building. A new cement floor has been laid in the playroom in the basement and a new well has been drilled. A Beatty pressure pump, electrically driven with automatic features has been installed at the public school and water has been piped to the high School. Drinking fountains will later be installed in both Schools.

There has been a change in the teaching staff, two new teachers having been engaged in the high school and one in the public school.

The following is the staff
High School: Mr. C. J. Kirk, principal, Miss Iva Rupp and Mr. D. Cameron.

Public School: Mr. C. R. Ford, principal, Mr. E. Traub, Miss A. Jackson and Miss Ruth Liesemer.

Labor Day

Monday, September 2 being Labor Day, will be observed as a public holiday. Stores and business houses will be closed all day, and open all day on Wednesday.

To Re-gravel North Rd. Immediately.

Re graveling of the 25 miles of main highway from Calgary to Crossfield will commence immediately, at a cost of \$25,000, it was announced by the provincial public works department Monday. The project is a maintenance job in a section of highway that has been subjected to heavy traffic during the summer. Contract for the work was awarded early last week to Bennett & White, Calgary contractors.

Evangelical Church Notes

The sermon subject on Sunday morning will be "Part-Time Saints" and in the evening "The Christian Attitude Towards Labor."

Service will be held at Elkton School on Sunday at 2:30 p.m. Rev. H. J. Wood will conduct the service.

Game Preserve Near Didsbury

Opening of two new provincial game preserves in which game birds and animals will be protected was announced Monday.

The new Didsbury preserve will comprise all those parcels of land in sections 3, 4, 9 and 10 in township 32, range 4, west of the fifth meridian, including drainage of the Little Red Deer River and its tributaries between these sections.

This preserve includes land owned by Messrs. W. Davies, Sutherland, Jahnke and Spooner.

The new Innisfail game preserve will comprise all parcels of land in sections 18 and 19 of township 35, range 1, west of the fifth meridian, including the drainage of the Little Red Deer River and its tributaries within these sections and including the road allowance being that portion of the township boundary lying between sections 18 and 19, township 35, range 1, and sections 13 and 24, township 35, range 2.

Threshing Barley.

The first report of threshing for this season to come to hand is that Mr. Birdsall, northeast of town, commenced threshing barley Tuesday.

Community Hall School Fair

The School Fair at Community Hall will be held on Wednesday, September 4, and from reports received it is very popular with the pupils and the prospects are for as successful a fair as any in the past.

Three schools, Neapolis, Jutland and Mona, are taking part in the fair, and the pupils will exhibit stock, garden produce, cooking, sewing and school work. Four Judges, supplied by the Olds School of Agriculture, will judge the exhibits.

In the afternoon there will be sports for the children. Any information can be obtained from the secretary, Mr. Hugh Roberts.

Death of Old Resident.

Hiram Wallace, a well-known oldtimer of Western Canada, died at the family residence, Calgary, on Monday, August 12, aged 87 years.

The late Mr. Wallace was a resident of Olds in the early days, when he was proprietor of the hardware business later purchased by R. B. Wilkinson, and now known as the Builders' Hardware. He was also actively engaged in farming, specializing in raising and training harness-race horses, which he continued to do up to the time of his death.

Mr. Wallace spent the last two or three summers training his horses on the Didsbury track.

With a record vote polled at the election last Thursday, E. P. Foster was elected on the first choice ballot. He received 2,704 votes against a combined total of 1,512 for all other candidates. A. Sheeline, Liberal, received 608; A. B. Claypool, U.F.A., 603; and A. S. Gough, Conservative, 301.

The details of each poll are as follows:

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1½ cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved, fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chipped ice.

"SALADA" ICED TEA

Whither?

Like many other Canadian citizens the writer listened to Hon. MacKenzie King's first radio broadcast a few nights ago, just as he has listened to the radio addresses of Premier Bennett and other political leaders in which their respective party programmes and public issues of the day were discussed. In his address Mr. King gave emphasis to a word—Whither. He, of course, applied it to the political trends of the day and asked the Canadian electorate to give serious thought to "whither" the various policies now being urged upon them for acceptance were leading.

It is not the intention of the writer to follow Mr. King in giving to this word a political application. Party politics are eschewed as subjects for discussion in this column. But as we listened to Mr. King and his use of this word, the thought was forced upon us: Do we as individuals ask ourselves, as we should, whither we are headed in many of the undertakings upon which we embark? Or do we lightly engage in them without sufficient consideration, and without any very clear idea fixed in our minds as to what we hope to achieve?

A sailor as he leaves his home port knows whither he is bound. He is headed for a definite port, and he equips himself with chart and compass to guide him to such port by the most direct route. He knows why he is headed to such particular port. An explorer does not lightly enter into the trackless forest or well-nigh impassable jungle without knowing whither he is bound, and the mining prospector likewise knows whither he is bound and the objective he hope to achieve.

But how many of us as we pursued our way through public school, and possibly through high school and even college and university had a definitely defined goal before us which it was our ambition and determination to reach? Did we, as we devoted years to study, know whither we were bound, or did we proceed unthinkingly with our school studies with no very fixed idea in mind as to the vocation in life we proposed to follow?

And as we possibly just drifted into some kind of a job, or were apparently forced into some position or occupation seemingly by environment or force of circumstances, did we even then asked ourselves, whither am I going? Is this the kind of work for which I am best fitted? Or am I just allowing myself to drift without any particular effort on my part to direct my life into proper channels? In a word, did we take the trouble to provide ourselves with a chart and compass to guide us to our true destination?

Furthermore, having found our lot cast in a particular field of endeavor, and possibly feeling fairly content therein, did we even then query ourselves—whither? That is, did we merely accept our work as a means of livelihood, and nothing else? Or did we, do we now, regard our work as something more, something finer, than a means of sustenance? Whither are we headed? To render real service to mankind and to our country, to make the world a better and happier place because we are in it, or are we simply content to walk the treadmill of life as we find it?

As citizens do we ever take time to pause and consider whither the community in which we live is headed, whither our churches are taking us, whither our schools and colleges are educating our children? What are the moral trends of the times? Are they in the direction of developing stronger characters than those of bygone generations, or is the reverse true? Is our own little community growing better, or worse; is it being beautified or is it retrograding?

Nothing in Nature stands still. If it has life it is moving, either forward or backward. Nature abhors a vacuum. Mankind is the chief of all the works of Nature, and he must progress or slip backward. Each individual, if he or she is wise, will stop and ask—whither am I going? The person tempted to a dishonest or criminal act should pause and consider, whither? What is the end of the road upon which I propose to travel?

And what is true of the individual, is true of the nation. All nations and all peoples may well ask themselves at this time of predictions of war, or warlike preparations in all parts of the world, of uncompromising attitudes of nations in international conferences, whither are we drifting? What will be the outcome, the end, of another war? The Great War was a source of loss to the whole world, to the victors as well as to the vanquished, and to those who remained neutral. Each and all suffered. It will be so again. Is that what we want, as nations, as individuals? Is it not time we stopped and gave consideration, the most serious consideration of our lives, to that old English word—whither?

Let the reader apply this word to his own actions, his life activities, his next decision. Try and probe the future a bit; seek to visualize the outcome of any move you are about to make. Do not go blindly and thoughtlessly ahead. Ask yourself in all seriousness—whither?

Crowds Worship Sign

Crowds of superstitious persons have each night been worshipping before a mysterious red glow in the window of a school in the French concession at Shanghai. They believed it to be the appearance of a certain Chinese deity. Then the red glow was found to be merely the reflections of an illuminated sign over a theatre across the street.

Ban Was Strict

The word "tabu" is an Hawaiian contribution to the list of American folk words, says a bulletin from the Pan-Pacific Press Bureau. Ancient Polynesians had many tabus, typical among which were those forbidding women to eat in the presence of men, or in the same house, or even to cook their food under the same roof.

Slow-Motion Camera**Photographs Lightning****Same Electricity In Bolt As In Ordinary Light Bulb**

Slow motion cameras have been used by science editors of The Country Home, New York, to measure thunderbolts and estimate just how much electricity is released in a flash of lightning.

Considering all the noise a thunderstorm can make, it is a little disconcerting to discover that the average thundercloud has a store of only just about as much electricity as flows through an ordinary electric light bulb in a minute. It generates this much electricity in five minutes, maintains it at this value for a longer or shorter period, and then lets it fly as a lightning flash at a pressure of about five billion volts, enough to blow a man down, or a horse, or even a small house. The pressure makes the discharge both spectacular and dangerous, and the thundercloud machine is continuously generating electricity at this pressure, a single cloud often developing three million kilowatts of power.

Photographs indicate that when a cloud is ready to hurl a thunderbolt it first oozes out a tiny tongue of flame. This stretches earthward about 50 yards from the cloud. It pauses and then wades out for a 10,000th of a second. It then reappears and stretches another 50 yards. This process continues until the ground is reached. Branch tongues often spring out from it. The instant the leading tongue lashes the earth, the main part of the stroke begins. A brilliant flame sweeps upward from the ground toward the cloud, retracing the path literally blazed by the leader. This second stroke is much quicker lasting but 50 millionths of a second.

Toast King In Silence**Irish Freemasons Find It Best Way To Avoid Trouble**

Irish Freemasons have adopted the suggestion of Patrick Ruttledge, minister of justice, that "God Save the King" should not be sung at future dinners.

During a dinner of the Cork Lodge a band of men rushed into the lodge, overturned the tables and fired revolver shots, using blank cartridges. It was believed that this outrage was committed because the guests exhibited too much fervor in singing "God Save the King."

Following this episode, Ruttledge offered to provide protection for Masonic lodges on the occasion of annual dinners but he was assured this was not considered necessary. He then suggested that "God Save the King" could be omitted in future.

The suggestion was adopted but Masons will continue to toast His Majesty. The toast will be in silence, however, so that extremists can scarcely find grounds for breaches of the peace on its account.

A New Burglar Trap**Calgary Man Has Invented Gadget To Protect Banks**

A burglar trap designed for use in banks has been invented by Adolf Johnson, of Calgary.

In his home he has built a working model of his invention. When a small button is stepped on, steel plates slip quickly into place over windows and revolving door sets blocking escape of robbers.

Johnson patented the contrivance in 1922 and has been working on it ever since with a view to adding new features. Among other inventions he has developed are semaphore signals for street intersections, a parachute plane without either landing gear or wings and a number of automatic gates.

Piron, the French author, was arrested and arraigned by a belittling magistrate. "You're a poet, eh?" the judge sneered. "I have a brother who is a poet."

"Then our families are even," Piron retorted, "for I have a brother who is a fool."

Oaks are more likely to be struck by lightning than any other tree, declares a London expert, who has reported that since 1932 not a birch, beech, holly or horse chestnut in England has been struck.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

FASHION FANCIES**Becomes Separate Grade****Recompense For Garnet Wheat Holders If Loss Results**

Effective Aug. 1, Garnet wheat will be marketed as a separate grade, E. B. Ramsay, chairman of the board of grain commissioners, announced. Its price, he said, will be determined by ordinary market conditions.

The wheat will be marketed through existing channels, stated Mr. Ramsay. He looked upon the change as a routine matter, which should produce no undue difficulties.

At the last session of parliament, \$1,500,000 was voted to recompense Garnet wheat holders while the new method of marketing was being evolved, if any loss resulted. Previously, Garnet wheat had been graded with No. 2 Northern.

The new grade will be separated into two varieties, No. 1 Garnet and No. 2 Garnet. Any Garnet wheat not good enough to be graded No. 2, will be put into No. 3 Northern or lower grades. The price of the new grade will be fixed in the open market, similar to the present method in force in other grades.

STOPS ITCHING In One Minute

D. D. Prescription Speeds Relief

For quick relief from the itching of pimples, mosquito or other insect bites, eczema, rashes and other skin eruptions, apply Dr. Dennis' pure, cooling, liquid, antiseptic D. D. D. Prescription. Forty years' world-wide success. Penetrates the skin, soothing and healing the inflamed tissues. No fuss—no muss. Clear, greaseless and stainless—dries up almost immediately. Try D. D. D. Prescription. Stops the most intense itching instantly. A 35c trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

Relic Of Riel Rebellion**Old Ox-Yoke Presented To Museum In Regina**

An exhibition is an ox-yoke made in 1882 by the late George Cross of Inchkeith, Sask., and later used in the Riel rebellion in 1885.

It is made from oak and some idea of its durability was learned when it was found that for over 40 years it has lain outside in all kinds of weather and is yet in a good state of preservation. It is being presented by Mrs. Cross to the museum at Regina as a souvenir of early days in Saskatchewan.

Antonio Stradivari, famous violin maker, died almost 200 years ago, but the quality of the varnish used on his violins has never been equalled.

BABY'S OWN SOAP

Best for You and Baby Too

Piron, the French author, was arrested and arraigned by a belittling magistrate. "You're a poet, eh?" the judge sneered. "I have a brother who is a poet."

"Then our families are even," Piron retorted, "for I have a brother who is a fool."

Oaks are more likely to be struck by lightning than any other tree, declares a London expert, who has reported that since 1932 not a birch, beech, holly or horse chestnut in England has been struck.

For Economy's Sake

Breakfast in bed may be only for wealthy Occidentals, but in Japan it is an economy measure, reports Miss Frances B. Clapp, Congregational missionary, just back from Kyoto, Japan. Fuel shortages makes it cost about 50 cents to build a fire, so many Japanese eat breakfast in bed to keep warm, said Miss Clapp.

In Turkestan a form of grass has been discovered that when uprooted by storms it falls downward and re-plants itself.

Plant Breeding Program In Canada Carried On For The Past Fifty Years

Fifty years ago failure to find a variety of wheat suited to Canadian conditions led to the introduction of a program of plant breeding which has been carried on unceasingly ever since with results that have made Canadian-grown wheat famous throughout the world. Another important field crop which is receiving the attention of plant breeders is oats. The oat crop ranks second in total value among all field crops in Canada and makes up about 30 per cent. of the total cereal crop production. With a crop of such national importance, which is being grown under widely different conditions of soil and climate, there are naturally many problems which demand the attention of the oat breeder in his efforts to assist in maintaining a high standard of production and quality.

The Dominion Department of Agriculture, through the Experimental Farms System and the Dominion Rust Laboratory, Winnipeg, has been for many years endeavouring to breed varieties resistant to such diseases as stem rust, crown rust and the smuts. The oat improvement program includes the development of early, high yielding, disease resistant varieties suited to the various districts of the country, the development of stronger strawed varieties, improvement in the quality and yield of the standard sorts and the description and classification of varieties. A collection of more than 500 varieties of oats has been introduced from foreign countries throughout the world, and is being studied with the hope of finding some that may be adapted to Canadian conditions or may possess certain qualities that would make them useful for breeding purposes.

Division Fairly Even

Premiers Affiliated With Catholic, Presbyterian, And United Churches

Of Canada's one prime minister and nine premiers, four are Roman Catholic, four United Church and two Presbyterians.

The four premiers in the east are Catholics; the prime minister and three premiers in the centre and middle west are United Church; and the two far western premiers are Presbyterians.

Premier Macdonald of Nova Scotia, Dysart of New Brunswick, MacMillan of Prince Edward Island, and Taschereau of Quebec are Roman Catholics.

Prime Minister Bennett of Canada, and Premiers Hepburn of Ontario, Bracken of Manitoba, and Gardiner of Saskatchewan are United Church.

Premiers Reid of Alberta and Patullo of British Columbia are Presbyterians.

L. P. D. Tilley, whose government has just been defeated at the polls in New Brunswick, is an Anglican.—Windsor Star.

People Using More Sugar

Annual Average Consumption For Four Years Is Higher

The world's sweet tooth is evidently growing bigger, says a bulletin from the Canadian National Railways, in which the writer reports that the annual average consumption of sugar for the four years, 1931-34 inclusive, was 26,561,000 tons, an increase of 3.36 per cent. over the five-year period 1926-1930. Cuba has dropped considerably over the world supply of sugar, her production at present standing at 9 per cent. whereas in 1925 it was 21 per cent. The British West Indies is also an important source for sugar, much of that reaching Canada coming in vessels of the Canadian National Steamships fleet in the direct Canada-British West Indies service.

Wheat Graded High

The grading of Manitoba wheat was so high last year that only four per cent. of the entire crop was retained as feed for livestock and poultry—1,500,000 bushels out of a total of 37,100,000 bushels.

Covered Smut Of Wheat

Brandon Experimental Farm Note Tells How To Detect It

Covered smut or bunt of wheat is usually not recognized on the farm until it is found in the threshed grain. This is because the smut spores in the standing grain are completely covered by the seed coat so that infected heads appear normal unless they are closely examined. During the time wheat is in head, but before it is ripe, the normal heads are yellowish green. If plants infected with covered smut are present, they are usually shorter than the others and the heads are a dark bluish green. When the wheat is in the dough stage, the kernels containing smut spores are usually plumper than the others and cause the glumes of the wheat head to be spread widely apart so that the dark bluish green kernels are exposed. When such kernels are pinched with the thumb nail, they break easily, exposing the black, oily spores. In the threshed grain the disease is easily recognized by the presence of black bunt balls, by the presence of spores on the brush of normal seeds, and often by the offensive smell of the spores. This disease is controlled by the use of resistant varieties or by seed treatment.

Kind To Photographers

Prince Of Wales Is Popular With Camera Men

Newspaper photographers tell a good story about the Prince of Wales, who is popular with the camera men. Once, when the Prince was staying with a distinguished Bostonian, policemen surrounded the house and grounds. No one was allowed near. But the cameramen came as close to the hedge as possible.

The Prince was returning from a ride through the grounds, when he spotted the photographers. They were frantically trying to get pictures of him from the distance. Not wishing to offend his host by inviting the cameramen to come in, the Prince rode over to the hedge. Then he posed for pictures. Not until he asked and was assured that the photographers were satisfied, did he ride away.

News photographers usually find that the more important a man is, the easier he is to get to pose. It will be recalled that the present Prime Minister Baldwin of Great Britain made a big hit with photographers during the Imperial Conference at Ottawa by his readiness to respond to requests for a picture.

Cushions For Fragile Freight

New Spring System Designed To Cut Loss In Transit

Fragile freight in the future will ride on special cushions both within and outside the car, according to reports at the quarterly Eastern Claim Conference in Atlantic City.

Progress was revealed in developing a new system of springs between the boxcar and the wheels, to check or "snub" the constant up and down bouncing of the rail joints under the train.

Tests were made with recording instruments over millions of miles of freight car travel to determine the amount of vibration, and it was found to be large. Research engineers drew upon the experience of automobile designers in evolving the new spring system, delegates said.

Another development reported was a special cushion arrangement to be used when glassware is shipped by freight. Such products amount to millions of dollars a year in value of shipments and breakage losses become serious, the freight claim agents admitted.

An egg is supposed to be at its best when about 12 hours old. If you wish to preserve eggs for any length of time cover them with fat, wax, limewater, or pack them in sawdust or meal. Eggs should be kept in a cool, dry place.

A Paying Industry

Canada's Commercial Feed Industry Is Growing Rapidly

The commercial feed business in Canada is growing rapidly. It has become firmly rooted and is here to stay. It has possibilities for wonderful development within the domestic field, says the June issue of the Canadian Society of Technical Agriculturists Review, and is capable of becoming one of the most potent factors in the development of the Canadian poultry and livestock industries. All commercial mixed feeds in Canada are subject to the regulations of the Feeding Stuffs Act which is administered by the Seed Branch of the Dominion Department of Agriculture, and each year every feed manufacturer must register with the Department the ingredients and chemical analyses of all mixed feeds. Also, a list of the ingredients and of the guaranteed chemical analysis of each feed as to protein, fat, and fibre must be plainly printed on the bags or containers used, or on a suitable tag securely attached thereto. In conjunction with the official registration is the regular systematic inspection of all mixed feeds by the Seed Branch in order to make sure that the manufactured products conform to the registered guarantee as to composition and chemical analysis. This inspection constitutes an added protection to the users of commercial feeds. The present registrations include 71 ingredients which may be classed as grain products and 74 which are non-grain products, but the actual number in general use does not exceed 35 or 40.

Good For Grafting

The earthworm lends itself to grafting experiments so readily that many freakish individuals have been concocted in the laboratory. Even when the tails of two worms are united, they will grow into a headless worm, which may live for months despite the fact that it cannot feed.

"It is impossible to change human nature but possible to change human behavior."

Red And Black Rust Are Different Stages In Life Of The Same Organism

Identification Important

Pure Bred Pigs Cannot Be Exported To U.S. Without Tags

From information received by the livestock branch, Dominion department of agriculture, the importance to swine breeders of the new regulations recently enacted under the Pedigree Act, whereby all pigs born in Canada since Jan. 1, 1935, must be identified either by tattoo marking or by ear tags before the pigs are eight weeks old, and before weaning, are not being fully appreciated. The new system requires that if a breeder decides to tattoo his pigs, the identifying letters shall be allotted by the Canadian livestock records, Ottawa, and if he favors the use of tags then these must also be ordered through the same organization. Not until the proper identification of the pigs has been made will the official registration be recorded. Moreover, the export of pure-bred pigs to the United States cannot be made without this identification. This system, if properly followed, provides a distinct and positive identification for every registered pig in Canada. The advantage to the purchaser is that a definite link is established with the pedigree certificates of the pigs.

With the keen demand at present for pure-bred pigs, compliance with this new method of identification makes it possible to sell pure-bred swine as registered stock without difficulty.

"It is impossible to change human nature but possible to change human behavior."

Emerson said there is a solution for every problem.

What is the difference between "red rust" and "black rust" of grain? Dr. J. H. Craigie, officer in charge, Dominion Rust Research Laboratory, Winnipeg, supplies the answer in the following statement:

"There is considerable confusion in the public mind regarding the relation of 'red rust' to 'black rust' of grain. Many people regard them as two distinct rusts. As a matter of fact, they are merely two different express'ns of one and the same disease. The disease first appears on the plant a 'red rust' (that is in the red stage) and this stage continues while the crop remains green. When the crop begins to ripen, the red stage gives place to the black stage, the so-called 'black rust.' A far better name for the disease is 'stem rust' as it is the stems of the plants that are mainly affected, although infections also occur on the leaves.

"It is while the disease is in the red stage that it spreads. The red color is due to the reddish spores produced by the organism. They are distributed by winds and cause new infections.

"In the black stage, the spores are dark in color. These spores remain attached to the plants and are not carried about by winds, at least to any extent. In fact, the black spores are incapable of infecting cereal plants. (The role they play in the life history of the organism need not be gone into here.)

"One point more should be noted. It is generally stated that the 'red rust' doesn't do much harm to the crop, but that the damage is done by the 'black rust.' This is altogether a misconception. As pointed out above, the 'red rust' and the 'black rust' are different stages in the life of one organism—the fungus that causes stem rust. From the time the red stage appears on the plants and right along until after the black stage appears, the plants are being drained of food and water by the organism. It is therefore wholly incorrect to say that 'black rust' alone does the damage. Both the red stage and the black stage are responsible for the sum total of damage done to the crop, but most of the damage is probably done before the black stage appears.

Dates Back Many Centuries

Investigators Think Wine First Made About 7000 B.C.

Noah was not the first wine grower. Far from it, according to Rene Dage, and Alban Arnaud, respectively French cenozoist and wine expert, who after searching new light on the history of the grape in Egypt and elsewhere, have delivered their report.

Noah dated from somewhere between 3761 B.C. and 2105 B.C. Bacchus was real or a myth between 1500 B.C. and 1000 B.C. But the Egyptians were making wine in 7000 B.C., the investigators show, while the cavemen of latter stone age days could have done it first if they knew how, and it is more than likely they did. Thus the first wine might have dated from 10000 B.C.

The investigators found that the earliest traces of the grape vine date to the cenozoic era. Fossil prints show them with the pointed leaves of the species known in French vineyards to-day as American vines.

There is none of the 7000 B.C. vintages left except in dried form at the bottom of clay wine jars, and analysis of this dust has not produced any idea of its flavor. But something like 6000 B.C. was a good year the investigators conclude.

Windy City Rules Airways

Already the world's greatest railroad terminal, Chicago has become the world's busiest commercial air centre. The municipal airport set a new mark when the addition of half a dozen schedules brought the total daily arrivals and departures of Chicago's seven airlines to an even 100 planes. Newark, N.J., is second with 96 flights daily; Cleveland is next with 88.

The SNAPSHOT GUILD

Prove Your Angling Ability

Today's Snapshot Guild is directed to all wives, husbands, daughters and sons who follow the great outdoor sport of fishing. What has fishing to do with amateur photography? Just this. The Chicago Izaak Walton League, according to news dispatches, has included in its curriculum, in the fishing school conducted in Wisconsin, a "course of truthfulness." War has been declared against the angler who persists in telling about the "big one that got away." The law of the Izaak Walton League of Chicago regarding this phase of the art of fishing is very brief and to the point. Here it is, "Get your fish, take his picture or keep quiet."

No one in particular is being accused of telling little white lies about the "whopper" that got away but Chicago's Izaak Walton League law should be recognized throughout the world. The old adage about the cake might be revised to—"You can have your fish and eat it too" for although the fish may end its days in a frying pan or broiler, a picture of it will live forever.

There is one thing to remember in taking snapshots on fishing trips. Just as you use different kinds of bait for catching various species of fish so you must vary your methods of taking snapshots under different lighting conditions.

Suppose, for instance, that you are deep sea fishing or out in the middle of a lake under the glare of a mid-July sun. One of your party gets that long-hoped-for jerk on his line. If you have one of the average folding cameras it should be ready for ac-

tion with the diaphragm opening set at f.11 and the shutter speed set at 1/100 of a second. This setting of the diaphragm and shutter will serve two purposes. First—you will have the proper exposure and second—at 1/100 of a second you will stop the action as your lucky angler friend pulls the fish out of the water and into the boat.

If you have a box type camera use the second stop opening. In snapping the picture with this type of camera you will get the best results if you wait until the fish is safely in the boat and then snap the picture after the catch and when your subject is not in motion.

Let me caution you, however,

against a common error. Don't forget to set your camera for distance if it is of the focusing type.

If you have a fixed focus camera don't get closer to your subject than about eight feet unless you use a portrait attachment.

Now—suppose you are fishing on a river where the trees obstruct much of the light. Snapshotting under such conditions requires a different technique. Unless you have a camera with an f.6.3 lens or faster you had better forget about fast action pictures and confine your efforts to taking your subjects when not in rapid motion.

If you have a box type camera you should open it to a large stop and with the average folding camera open the diaphragm to f.8 or f.11 and set the shutter speed at 1/25 of a second.

And remember—"Get your fish, take his picture or keep quiet."

**Eyes of World
Are on Alberta**

The results of the Alberta election have received front page attention throughout the British Empire and it is interesting to note the reaction as seen in the different news despatches.

From London, England:

"With massed flags and drums beating, London Greenshirts, a body organized to popularize social credit in Britain, celebrated Alberta's election results with a march through 'the city' and three times round the Bank of England. 'We look on the march as symbolizing the fall of the walls of illusion regarding the problem of poverty in the midst of plenty,' the leader said."

The dean of Canterbury has been extensively interviewed and declares: "We are fighting the banking monopoly of credit all over the world and it is a big fight. But we know we have a method whereby, if money were rightly understood and administered, we could put an end tomorrow to the destruction of foodstuffs and goods while there are people hungry for them. The Douglas scheme is the fulfilment of Christ's teaching, 'Here are hungry; let us feed them!'"

The London Morning Post says: "It is an interesting experiment, but we are pleased it is being tried in Alberta - not here."

From Ottawa:

"The new government does not look upon banks very kindly. Generally speaking, however, the people of that province, having given such enthusiastic endorsement of the new idea, they may be expected to take any consequences which may develop."

"If Mr. Aberhart's success means putting irons into the fire, the Dominion government may hardly be expected to be particularly active in pulling them out or in making any commitments for assistance. It is anxious, however, to maintain the credit of the province and fully expectant that provincial obligations to itself, which are plentiful, will be fully respected."

WEEKLY JOKE

Two young men and two young ladies were driving along a country road when a tire went flat. The two young men got out and looked disconsolately at the depressed tire, but made no effort to remove it, and never having done anything of the kind, did not know where to begin. What they did after a brief consultation with the girls was to hide behind a large tree that stood near the road. Before long a portly gentleman drove by in a large car, stopped, backed up and came to the aid of the distressed damsels. He changed the tire for them; they thanked him prettily and he drove off. The young men came out from their hiding and the happy quartette drove on.

Bites All Day.

Angler: "Did you fish with flies?"
Camper: "Fish with them! We fished with them, camped with them, ate with them and slept with them."

Lower Grain Storage Rates.

Something new in the history of the grain business in Western Canada developed this week when the Alberta Pool Elevators announced its intention of cutting the storage rates for grain carried in its elevators by approximately one-third, effective from August 31st, 1935, to August 31st, 1936.

Pool Elevators will charge 1.45c a bushel a day for grain in store, instead of 1.80c a bushel a day—the rate which has prevailed for many years. The new rate will apply for grain stored in its over 435 country houses as well as in its terminals at the Pacific coast.

Alberta Pool Elevators is a co-operative organization owned and operated by Alberta farmers. In that position it considers it a privilege to be instrumental in reducing costs in some measure to the grain growers in a year when crops have suffered severely from drouth, hail and frost.

U.F.A. Government Arranges Credit for Hailed-Out Farmers

The provincial government has completed arrangements with the banks whereby farmers in hailed-out districts would be able to secure credit to finance their operations for another year. Farmers would have to give their own security, and their applications would be granted in the light of reports already made to the government by the various municipal districts, according to an interview given Hon. George Hoadley in Calgary last Monday.

The plan was based on recommendations made by a conference of representatives of 8 municipalities in the area adjacent to Calgary. In this area, Mr. Hoadley said, some 142,414 acres had been hailed, nearly half of this being summerfallow crop.

Didsbury Saddle Stallion Goes to United States

Mildred Enquist, of Great Falls, Montana, trainer and exhibitor of high schooled horses, has just purchased from W. J. Fulkerth, of Didsbury, Alberta, Canada, "Max Dare," registered five gaited saddle stallion, sired by "The Dare 10513" and his dam being an imported mare sired by "Dr. Linn," grandson of "Rex Peavine," world's greatest saddle horse sire.

"Max Dare" won his class at both Calgary and Edmonton this summer, two of the largest shows in Western Canada. He is a very fine horse and because of his breeding quality, etc. should make a great show and stock horse.

Claims Rust Will Never Come Again

The "calamity of rust" which has taken its toll of millions of acres of rich wheat lands in Manitoba and Saskatchewan, can never happen again, believes Major H. G. L. Strange, chief of a Winnipeg grain research bureau.

Rust resisting wheat, he declared while en route north during an inspection tour, will eliminate the "red rust menace" from the prairies.

Rust resisting wheat has been perfected in Manitoba research laboratories, and the seed will be ready for the entire devastated area in Manitoba and Saskatchewan within two years' time, he declared.

The rust infection, he said, blew into the Saskatchewan and Manitoba districts from Mexico on the wings of prevailing southerly winds.

BERGEN—NICHE VALLEY

There was half an inch of ice on Wednesday night of last week and it froze the grain and gardens.

Rev. C. J. Hallman held his quarterly meeting Sunday of last week, and spent the week camping near Sam Dougan's ford.

James McCulloch hauled two loads of building logs, some 32 feet long, from the Valley last week. George and Cornie Neufeldt were into the Valley also for a load of wood and poles.

Some followers of Isaac Walton were here one rainy day recently. In all probability it was Charles Mortimer and Orville Geiger. They should have had George Julien also to represent the piscatory department of the Fish and Game Club.

Mike Dunwoody, who has been working all winter at Bradley's mill, had his leg amputated for T.B. of the bone. He will have to have another operation soon if he is able to endure it.

Grace Stevens is visiting her sister Florence Gilmore, and Bob Stevens, who is planing lumber on Harry Stice's Place.

Dinnerware Given Away at Movies

W. H. B. Sharp has made arrangements to give away "Wedgwood" dinnerware to his patrons at the picture shows in Didsbury.

A coupon will be given with every 35c admission and they may be redeemed any time at Mr. Sharp's residence.

Following is a list of the pieces and the number of coupons required for each piece:

	Coupons
Bread & Butter Plate....	6
Fruit Saucer.....	6
Egg Cup.....	7

Patrons are asked to cut out list for reference.	

Doings of Our Neighbors

At Innisfail: On Monday night or early Tuesday morning eight hogs were taken from the Mountain View hog run at the stock yards. It was evident from the tracks left that truck was backed up to the loading chute, the hogs driven from the Mountain View lot across to the C.P.R. stock yards, down the alley and loaded.

At Olds: The School of Agriculture at Olds will open for the 1935-36 term on October 22nd. No entry fee or entry examination is required, but the age requirement is 16 years and over.

A Great Producer.

James Bremner, secretary of the Canadian Jersey Cattle Club reports that the Jersey cow Waikiki Genesta's Dewbell owned and tested by N. S. Clarke has been awarded a gold and silver medal certificate by the Canadian Jersey Cattle Club. Dewbell went on test at 4 years and 230 days of age and in 365 days produced 10,902-lbs milk and 700-lbs fat, with an average test of 6.42. This is the third record made by this great producing cow. As a 3-yr-old she won a silver medal certificate when she produced 591-lbs fat.

Notice to Relatives of Persons On the Assessment Roll And to Tenants

Notice is hereby given that during the months of September and October, applications may be made under the provision of section 188 of the Town and Village Act for inclusion in the voters' list of the town of Didsbury by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears on the assessment roll who are entitled to be placed upon the said list—

(a) if he or she is resident with the said person within the town or assists in a business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty-one years; and

(c) if his or her name does not already appear on the roll;

Tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year.

TOWN OF DIDSBURY

W. A. Austin, Sec. Treas.
August 28th, 1935.

Thanks.

Allow me to take this opportunity to thank the people of the Didsbury Constituency for the help and support given me during the recent Provincial Elections.

Reduction in Grain Storage Rate in Alberta Pool Elevators

Announcement is made that a storage rate of 1.45 of a cent a bushel per day will apply on grain stored in all Alberta Pool elevators, effective from August 31, 1935 for the ensuing license year. The present rate, which has prevailed for many years, is 1.30 of a cent a bushel a day.

The ALBERTA POOL ELEVATORS is making this voluntary reduction as a temporary measure in reducing cost to grain growers during the present recognized emergency in the marketing of grain.

The proposed reduction will affect 435 Pool elevators in this province, as well as 4 terminals operated by the Alberta Pool on the Pacific Coast.

Waiting for the King

Canadian undergraduates who go to the Old Country in their summer vacations enjoy many unusual sights and meetings but the group shown above, encountered its biggest thrill when the royal automobile was stopped and the King and Queen chatted with them about Canada,

the British Isles, in addition to the sight-seeing features that are a part of every Old Country tour. The group was viewing Buckingham Palace from the Mall when Their Majesties set out for a drive. They stopped the car and chatted with the Canadian students for 10 or 15 minutes.

WORLD HAPPENINGS BRIEFLY TOLD

The Duke of Gloucester, the King's third son, has been made a full major in the 10th Royal Hussars.

Before sailing for home the Canadian Bisley team enjoyed a round of hospitality at Glasgow, Scotland.

The British House of Commons adjourned Aug. 2, to re-assemble Oct. 28, it was announced by the government, indicating no plans for a general election before next spring.

The electric chair installed in Sing Sing Prison 44 years ago has taken the lives of 375 persons, only four of whom were women, it was revealed by prison authorities.

Eventual combination of all British territories from the Cape to East Africa in a "United States of Africa" is suggested by G. M. Huggins, prime minister of Southern Rhodesia.

Many stores and factories, which have been closed since the recent fatal riots in Belfast which resulted in the death of many Catholics and Protestants, have been reopened.

Harold Sutherland, 17, of Westville, N.S., first piper to play for television, was an honored guest at a service club luncheon in Charlottetown. Three years ago Sutherland was Canada's champion boy piper.

Improvement in barley crops and marketing were discussed when a field day was held at the University of Manitoba farm near Winnipeg under auspices of the National Barley Committee.

Double details of military police paced outside the United States army reservation while officers, amid utmost secrecy, studied a new "mystery ray" said to be capable of detecting the presence of a ship at sea through fog and darkness.

Record Of Publisher

Lord Atholstan Has Served Montreal Star For 66 Years

Lord Atholstan, publisher of the Montreal Star, the Montreal Standard, and influential in other Montreal publications, has attained to the venerable age of eighty-seven years, and is still in active service, giving all his thought to the welfare of his country, his city and his daily service as a commentator on public affairs. Seldom does he miss a day at his office, and never the day but his direction of his newspapers is quite apparent.

Of his eighty-seven years some sixty-six have been given to the Montreal Star, and that is a record which has never yet been attained by any other editor or publisher in Canada—sixty-six years of continuous service and of rulership of the leading and most influential paper in Quebec, possibly in all Canada, for the Weekly Star is a wonder in its way, going each week to a quarter million subscribers.

Lord Atholstan was born as Hugh Graham, in the little village of Atholstan, Huntingdon County, on July 5, 1848, but journeyed to Montreal, as did many other ambitious lads from the peninsula of Quebec Province. He started the Star whilst the other papers in the metropolis were in either a somnolent or a poor stage.—Sherbrooke Record.

Need Lots Of Sympathy

Editors Of Newspapers Do Not Have Easy Job

Governor Eugene Talmadge, himself an editor in Atlanta, Georgia, shed a tear for newspaper workers.

"Newspaper work is all work and no play, and very little pay," commented the governor. "I used to think anybody in newspaper work had a nice, interesting job."

"When you keep a paper going, and try to keep your news columns interesting, let me tell you, brother, you've got a job on your hands. I'm keeping my paper out of debt, but it's hard work."

The governor is associate editor of The Statesman, a weekly political paper.

Doctor—"But, my dear man, I can't prescribe whiskey for you unless I am sure you need it. What are your symptoms?"

Patient—"What symptoms should I have, doctor?"

"Italy is rewriting an heroic page of her history."—Mussolini.
—Thomas in the Detroit News.

Recipes For This Week

(By Betty Barclay)

EMERGENCY SPECIAL

1½ lbs. round steak
½ cup fine dry bread crumbs
1 egg well beaten
1 teaspoon onion juice
½ teaspoon salt
Pepper
Milk to moisten

Put round steak or some other cut of beef through the meat chopper four or five times. Add other ingredients and mix very thoroughly. Add milk to make the right consistency to mold into small cakes about ¼ inch thick. Fry in hot fat until well browned. (Bacon or ham gives a good flavor.) Remove the meat cakes and make a gravy by adding flour to the fat remaining in the pan and stir until the flour is well browned. Use enough flour to make cream sauce of medium consistency (1 cup milk, 2 tablespoons flour). Add milk until desired consistency. Return browned meat cakes to cream sauce and finish cooking cakes over a low fire. This serves about eight persons.

DRIED APRICOT AND PINEAPPLE JAM

4 cups (2 lbs.) prepared fruit
7 cups (3 lbs.) sugar
1 bottle fruit pectin

To prepare fruit, add 2 cups water to ¼ pound apricots. Cover and let stand 4 hours, or overnight. Drain fruit, grind or chop fine, and mix with juice. Crush well or grind 1 medium, fully ripe pineapple or use 1 No. 2 can crushed pineapple. Measure sugar and prepared fruit into large kettle, filling up the last cup with water if necessary. Mix well and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Then remove kettle from fire and stir in bottled fruit pectin. Skim; pour quickly. Paraffin hot jam at once. Makes about 11 glasses (6 fluid ounces each).

Ends Long Canoe Voyage

Montreal Girl Makes Trip To New York Alone

"Fed up" with humanity, Ida Lyman, 22-year-old Montreal social worker, recently completed a 550-mile water trip from Montreal to New York in a 15-foot Eskimo kayak.

"This trip has been a good rest for me," she said, after she finished telling of the rigors of the voyage. Storms and rapids beset the route—via Lake Champlain—which was that taken by the pioneers of 200 years ago.

She is the first person to make the trip single-handed, said Capt. Bill Byrne, president of the George Washington Boating Association, New York, at whose float she tied up.

Miss Lyman, a native of Denmark and a naturalized Canadian, said the first leg of the trip was the hardest. "There's a lot of white water in the Richelieu River between Montreal and Lake Champlain, and several days I had to buck storms," she said. Her cockleshell craft she built herself two years ago.

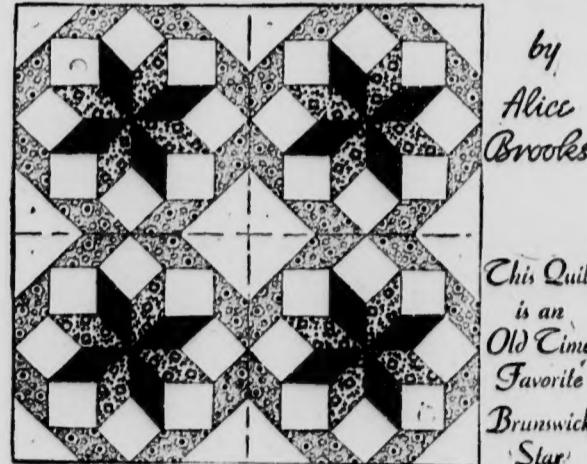

Miss Lyman returned to Montreal—by airplane.

Knew Famous Nurse

Ontario Minister Was Once Engaged To Florence Nightingale

Among the interesting books and papers which have been presented to the University of Western Ontario, London, by Thomas Connor of Goderich is a collection dealing with Rev. John Smithurst, who died at Elora, Ontario, in 1867, and who in his youth was engaged to Florence Nightingale, the famous nurse. Rev. John Smithurst was born in Derbyshire, England, and was a cousin of Florence Nightingale. In his youth they were engaged to be married, but as he was an older man the families objected and the engagement was broken. Mr. Smithurst came to Canada as a missionary and his fiancee went on to reach great heights of fame as a nurse.

Household Arts

PATTERN 5249

"Twinkle, twinkle little stars," and they're really not so very far, for this is the kind even you can capture and anchor securely to earth by means of a beautiful patchwork quilt. The "Brunswick Star" with its eight clearly defined points, bordered by eight contrasting diamond patches, has all the delicacy of a snow crystal, yet is surprisingly easy to piece, and make a decorative repeat on an all-over quilt. Only four materials are needed for it and, to simplify matters, there are only three pattern pieces. This quilt is an old colonial favorite.

In pattern 5249 you will find the Block Chart, an illustration for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Meet All Demands

Planes Have Been Built Novice Can Handle Safely

Eugene Vidal, federal director of air commerce arrived at Detroit from Washington and reviewed the progress made to date in the nine most promising projects concerned with the development of a light and inexpensive airplane sufficiently safe for any automobile driver to fly.

Despite the apparent inability of the aircraft industry to believe in the possibility of turning out a \$700 airplane as indicated by the machines on exhibit at this 1935 all-American aircraft show, Vidal asserted there is every hope that such a machine will be on the market within a short time. He said several builders whose experimental designs were ordered built by the bureau have turned out machines which seemingly meet all these demands.

"At least three of our projects are very promising indeed," he said. "The ships can be flown absolutely safely by novice pilots. They do not spin. They land themselves handoff or with the stick, all the way back from 200 feet. They are what we think are safe airplanes. They can be flown with only a couple of hours instructions almost by anyone at all."

Town Crier Not Needed

Newspaper And Radio Have Killed Profession In England

The job of town crier of Cromer, England, does not pay and R. H. Laurence has resigned the post. The crier's average earnings during the summer season were only \$3 a week. In the winter he earned practically nothing at all.

Hence the office of town crier has become vacant and the gorgeous uniform has been folded away among the mothballs. The 200-year-old bell is silenced.

In the summer there were entertainments and theatrical performances to advertise in the ancient manner of "crying" in the streets. Occasionally a visitor employed the crier to announce the loss of some article. For a modest fee Laurence donned his uniform, packed his bell under his arm and worked his way right through the town, stopping at every important corner to cry his news.

Town crying as a profession in England is falling away. Newspapers and the radio have cramped their style.

A Homemade Waterfall

Man In Saxony Had Bright Idea For Making Money

There is always another way to make a living.

Herr Franz Donath of Lichtenhain, Saxony, has a small house a short distance from the main road, where a well-watered creek flows over a 15-foot bank and plunges down with splashing noise upon rocks below. Since the waterfall is on his property, he conceived the idea of damming the creek just above the bank, thus accumulating in short time a large amount of reserve water. He hung out a sign that for 10 pfennigs visitors can witness a roaring waterfall. He collects the money and pulls a sluice, releasing the rushing torrent.

In less than a minute the pent-up waters are gone and the show is over. Enough visitors daily pay the fee to bring him a comfortable living.

Praise For The Press

Real Guide In Municipal Affairs States Finance Expert

"I know of no single agency which can do more toward remedying existing defects in municipal administration and guiding councils and officials along sound economic lines than you—the members of the press," Thomas Bradshaw, municipal finance expert, told the closing session of the Canadian Weekly Newspapers' Association convention in Toronto. Charles A. Barber, of the Chilliwack, B.C., Progress, was chosen president of the association.

Woman learning to drive: "But I don't know what to do!"

Her husband: "Just imagine that I'm driving."

Little Journeys In Science

ALKALIS

(By Gordon H. Guest, M.A.)

The term alkali is of Arabic origin, and is used to designate certain substances like lye, washing soda, and ammonia solution which are capable of neutralizing acids. Alkaline substances possess properties in many ways just the opposite of those of acids. A carefully balanced mixture of an alkali with an acid is generally neutral, being neither acid nor alkaline. A person who has swallowed an acid poison is given a dose of an alkaline substance such as washing soda, which is known in science as sodium carbonate, or even plaster scraped from a wall.

Alkalies when dissolved in water have the property of turning red litmus, a dye extracted from certain lichens, blue. A substance which changes its color upon the addition of an acid or alkali, is known by scientists as an indicator.

The most common alkalis are sodium hydroxide or caustic soda, potassium hydroxide or caustic potash, calcium hydroxide or slaked lime, and ammonium hydroxide or ammonia water. In science the term base is also used to designate an alkali.

Sodium hydroxide is a white solid compound, which may be prepared in the form of icing sticks. It is very soluble in water and the solution is usually called lye. This solution has a caustic taste and a slippery feeling. Sodium hydroxide is used on a large scale in the manufacture of hand soap. This is done by heating certain fats or oils, such as palm-oil and cocoanut-oil, with the alkali. A solution of this base is also used to remove skins from fruits, such as the peach, which is done by dipping the fruit into a boiling solution for a short time. When a piece of pure woolen cloth is boiled in a 10 per cent solution of lye, the material dissolves completely. Cotton, however, is insoluble and hence sodium hydroxide is used in testing goods for cotton or other vegetable fibres.

Potassium hydroxide, known commercially as caustic potash, is very similar to sodium hydroxide, but is more expensive. Calcium hydroxide or slaked lime is used on a large scale in mortar. It is also used for whitewash and in preparing lime-water. In the laboratory lime-water is used to test for carbon dioxide gas. When carbon dioxide comes in contact with calcium hydroxide, a chemical reaction takes place producing a white insoluble substance known as calcium carbonate, which changes the clear lime-water solution to a milky color. The breath contains carbon dioxide and hence if a person blows through a straw into a solution of lime-water, the lime-water turns milky. This is a simple experiment to show the presence of carbon dioxide in the breath. A lime-sulphur orchard spray is prepared by adding sulphur to calcium hydroxide.

Magnesium hydroxide is similar to calcium hydroxide, but is less soluble in water. Milk of magnesia is a very weak solution of magnesium hydroxide in which magnesia, or magnesium oxide, is suspended acids. Ammonium hydroxide is formed by dissolving ammonia gas in water. A solution of this base is used on a large scale as a cleansing agent and for neutralizing acids.

Blind Are Good Swimmers

Show Amazing Coolness When Diving From Springboard

Blind girls use their toes instead of their eyes, as was demonstrated to Viscountess Hampden at the opening of the new swimming pool at Chorleywood college, Hertford, Eng., where blind girls are being educated.

The pool has a raised pavement round the edge and the springboard is fitted with a doubled thickness of matting at its end. Using their toes as guides instead of their eyes, the girls plunge in with easy grace.

An official of the National Institute of the Blind says: "Swimming is one of the exercises that the blind enjoy with the confidence of sighted people and the coolness with which some of the blind girls at Chorleywood leap off a six-foot diving board is amazing."

The college is for those who are totally blind or whose sight is so poor that they dare not read more than one or two books in a year.

Famous Horse Put To Death

Prince, the imposing cream-colored drum-horse of the Royal Artillery mounted band, is dead. He was taken ill while rehearsing for the Jubilee Review and when an examination at the Aldershot veterinary hospital revealed his hopeless condition he was put to death. Prince was 18 years old, and was well known to the King and Queen.

CHAPTER XI.

It was after Mark Adam had continued on his way, fortified by a substantial dinner and armed with a pumpkin pie and Aurora's "compliments" for Jack, that Nancy carried a glass of warm milk into Cousin Columbine's bedroom, and asked if there were anything she could do for the invalid.

"You can sit down and let me look at you," responded the old lady. "I've got the upper hand of this cold already, and am staying here only because I believe in 'safety first.' Every hour wasted by sickness makes me impatient. There's so much to do in this wonderful old world; and when you're over seventy there's such a little time to do it in. Aurora tells me Jack's getting on all right—not that I expected anything else. He's got the Nelson grit, and there's no chance that he'll be imposed on at the Adam ranch. Eve would see to that even if John Adam wasn't the kindest soul alive. Some thought they were too easy going when the boys were youngsters, but—look at the four of 'em!"

"Well, you'll see them all in good time, unless you get desperate and run away from me. I love Pine Ridge even in a blizzard; but I can see how it looks like the end of nowhere to a girl brought up as you've been. I was glad Mark Adam happened in at dinner time to keep you company. Has Aurora Tubbs been talking you to death?"

Nancy laughed.

"Not quite. I let her rattle on and killed time listening."

"Killed time!" echoed Cousin Columbine. "Don't ever use that phrase again, child. Life's too short at the best, and even a day like this there are things to do. Everything's made too easy for people now-a-days. That's half the trouble with 'em. I was younger than you, my dear, when Father took me to Leadville. More than fifty years ago, yet I can shut my eyes and it seems like yesterday."

"Was it much of a place at that time?" questioned Nancy as Cousin Columbine sipped her milk.

"Much of a place! I wish I could make you see it. An entire forest had come down to make room for the town, Nancy; and new-hacked stumps of spruces were still standing in the streets—if they could be called streets. The houses were nothing but shanties or hastily made log cabins. Our own was of logs with a stove pipe for a chimney. The fam-

ily next us used old flower pots for the purpose. Some of the shacks had only canvas for roofs; and others—if you'll believe me!—no roofs at all. There were even shanties half buried in the earth, while some set up on posts. Folks were living in tents and wigwams, too—and now we shiver at a cold entry! Yes, life's too soft."

Nancy laughed as she hitched her chair nearer to the stove, and questioned: "Were there any shops, or did you get provisions from a distance?"

"There were stores of a sort, even at that time. I clearly remember the street where business was carried on. There were always groups of excited miners, with eager, sometimes desperate faces, standing in the middle of it, arguing and gesticulating—men of all sorts and kinds, my dear. The good and the vicious with one thing in common: the lure of silver. Gambling houses were open all night, and so were theatres."

"Theatres!" gasped Nancy. "In a place like that?"

Cousin Columbine nodded.

"Not at the very first, of course; but less than a year after the boom started, saw mills got to work, and dwelling places grew more comfortable. Banks, and business blocks, and dance halls sprang up almost over night; other places, too, which the town would have been happier without: saloons and gambling houses where many a hard-won fortune was thrown away."

"It doesn't sound like a very restful spot!" smiled Nancy.

Columbine Nelson laid down her empty glass and pulled the blankets a bit higher.

"A mining town in boom time," she asserted, "is about as restful as a hornets' nest that has been disturbed. Along in the early nineties when there was a stampede to San Juan county and the town of Creede was founded, I saw two lines in a newspaper that I never forgot:

It was day all day in the daytime,

And there was no night in Creede."

"And it was the same at Leadville. Bedlam broke loose after the men stopped work, and it was almost impossible to sleep till daylight."

"Was that the last of the gold and silver rushes, Cousin Columbine?"

"Creede came later than Leadville, as I said; then Cripple Creek, not to mention the Pemerton hoax, my dear. Some day I'll tell you about that, but I mustn't bore you with too many tales at once. We grow garrulous as we grow old, I fear; and it's years since I've talked over those times with any one."

"But I'm not bored," Nancy assured her. "You'll have to tell this all over again when Jack is here. I wouldn't have him miss it for the world. Do you suppose we could see one of those mining towns some day?"

"No reason in the world why you can't. Come spring we'll make an excursion to Cripple Creek. Even now it will give you an idea of how a mining town is built; and no doubt Mark Adam would jump at the chance to drive us over. Did he say how Luke was getting on?"

"He'll be home soon on crutches. Does Luke look like his brothers, Cousin Columbine?"

"Not in the least. He's the odd member of the family and resembles no one. Luke was a timid little boy and not quite so husky as the others. He's taking a year off before entering college."

"Aurora says he's his mother's favorite."

"Stuff and nonsense! If she felt any favoritism Eve Adam has too much sense to show it; but Luke's affectionate, and not ashamed to let folks find it out. I've thought at times that Eve had a leaning toward Matthew; but if that's true it's only because he's so shy she wants to protect him."

"How old is John?"

"Sixteen. Living with friends at the Springs and going to high school. He's headed for college in the East. He and Mark are as alike as two peas in looks; but John's more quiet and studious like his father. Mark's the liveliest member of the family, but Eve has a right to be proud of him even if he has only a high school diploma in place of Matt's A.B. He still hopes to study forestry when his father can spare him. Put

a stick of wood in that stove, Nancy, and then I'll try to get a nap."

As Nancy obeyed she glanced at the bedside table on which lay a copy of the Atlantic Monthly almost a year old. This reminded her of Pine Ridge's lack of reading matter, and she asked: "How does it happen that there's no library here, Cousin Columbine? It's a pretty small place, but doesn't anybody like to read?"

It was moment before the old lady responded; then she said: "I suppose most of the folks 'round here are—well, they haven't a great deal of education, and no background whatever. The Adams, and Theodore Taylor, our postmaster, are the exceptions. The truth is, Nancy, any youngsters with ambition usually leave town, which is not to the advantage of Pine Ridge as a community. Then too, every one has work to do, and reading's regarded as a luxury. That's wrong, of course; but being a pioneer I can understand it."

"But they have time to loaf around the store" observed Nancy shrewdly. "And if they could get good books just by going to a library, perhaps they'd stop buying those awful magazines Juanita feeds on."

"Maybe they would," admitted Cousin Columbine, "but public libraries don't grow on bushes; and in a place like this there's no Aladdin to rub his wonderful lamp and wish for one!"

Nancy laughed as she went out, leaving Cousin Columbine to her nap. Aladdin! What would she do to Pine Ridge if she possessed his lamp? This idea, and the inspiration which was born of it an hour later, so absorbed the girl that any necessity for "killing time" was quite forgotten.

"What you been doin' this long afternoon?" questioned Aurora, poking her head into the tower room without ceremony. "Supper's been ready for ten minutes; but everything's so still 'round here I thought maybe you was sound asleep."

Nancy glanced up from the lengthy and momentous letter she was writing to her Aunt Louise.

"You're right, Aurora. I think I've been asleep most of my life, but I'm waking up, thank goodness! Did you ever hear about Aladdin and his wonderful lamp?"

CHAPTER XII.

Nancy's letter to her Aunt Louise arrived on a Saturday, and she carried it out to Edgemere to read aloud. The young people had been gone more than a month, and as the strangeness of their absence wore away, life was settling down into its new routine, and Phil declared he never wanted to go back to the city.

There were times when his mother agreed with him. Despite financial worry, Margaret Nelson was conscious of a sense of restfulness which had been lost to her during the last few years. Fond as she was of her husband's sister, Louise's almost daily comments on the children often annoyed her; but now the week-end visit was something to look forward to. To-day she arrived on the train with her brother, and said before she had taken off her hat:

"I've a letter from Nancy. It's rather surprising on the whole. Shall I read it now?"

"Let's wait till I get supper on the table," suggested Margaret, with a glance at her husband's tired face. "Phil says he's famished, and no

TIRES FOR EVERY PURSE

Little Helps For This Week

Who hath despised the day of small things? Zechariah 4:10.

Little things on little wings Bear little souls to heaven.

An occasional effort even of an ordinary holiness may accomplish great acts of sacrifice, or bear severe pressure of unwanted trial. But constant discipline in unnoticed ways, and the spirit's silent unselfishness becoming the hidden habit of life, give to it its saintly beauty, and this is the result of care and lowly love in little things. Perfection is attained more readily by this constancy of religious faithfulness in all minor details of life, consecrating the daily efforts of self-forgetting love.

Love's secret is to be always doing things for God, and not to mind because they are such very little ones.

Some Old Bank Notes

Found In Ancient Records And Dated 1770 And 1776

Two samples of paper currency, issued by British Colonies in America before they became American States, have just come to light at Cincinnati, Ohio. They are a Maryland note for six dollars, entitling the holder to receive "Bills of exchange payable in London with gold or silver, at the rate of four shillings and sixpence for each dollar," dated 1770, and a New Jersey bill, issued in 1776, for twelve shillings. Both bear the warning: "To counterfeit is death." The bills were found in a bundle of old records in the Cincinnati Board of Education Library. How they got there is a mystery, since at the time they were issued Cincinnati was not even a trading station, and few white men had penetrated into that part of the Red Indians' territory.

For the funeral pyre of a Buddhist priest in Burma recently, an enormous white elephant was made of paper and bamboo, and the coffin raised to the canopied seat on the elephant's back for burning.

WEDDINGS

DAVEY—ROYDS

A quiet wedding was solemnized on Saturday afternoon, August 24, 1935, at three o'clock, in St John's Anglican Church, Moose Jaw, when Mae, eldest daughter of Mr. and Mrs. George Royds, of Didsbury, Alta., became the bride of Aylmer E. Davey, son of Mr. and Mrs. Ernest Davey, of Moose Jaw. Rev. Canon W. C. Western officiated.

The bride, who was given in marriage by Ernest Davey, was attended by Miss Grace MacGregor as bridesmaid, and the groom was supported by Mr. Bert Davey. Gowned in tyrol blue crepe with white picture hat and harmonizing accessories, the bride carried a bouquet of peach gladioli. The bridesmaid wore a Royal blue crepe gown with accessories to correspond. Her flowers were pale pink sweet peas. Little Miss Mary Davey, as flower girl, was dressed in pink taffeta and carried a basket of asters. Mrs. Thomas Royds, aunt of the bride, chose a swagger suit of sand flat crepe with matching accessories. Mrs. Davey, mother of the groom, was gowned in purple, with accessories to harmonize.

After the ceremony, a wedding supper was served at the home of the bride's uncle and aunt, Mr. and Mrs. Thomas Royds, Main Street South. The bride's table was laid with a Venetian lace cloth and centred with a three-tier wedding cake. The rooms were tastefully decorated with cut flowers. Mrs. Couzens, Mrs. Heming and Miss Ruby MacGregor assisted in serving the guests. Many beautiful gifts were received by the young couple.

The guests included: Mr. and Mrs. Elmer Davey; Mr. and Mrs. Ernest Davey, Billy and Rose Mary; Mr. and Mrs. Thos Royds and Billy; Mr. and Mrs. Bert Davey, Leslie and Margaret; Mr. and Mrs. Dempster Heming; Mrs. MacGregor, Miss Grace and Miss Ruby MacGregor; Mr. and Mrs. McClelland; Mrs. Couzens, Arthur, William, Jack and George Couzens.

Mr. and Mrs. Aylmer Davey will reside in Moose Jaw.

Melvin Notes

Mrs. Charles Young and Ross were visiting in Calgary Wednesday.

Mr. and Mrs. Hugh Morton spent Sunday with Mr. and Mrs. Peter Johnston.

Mr. and Mrs. Eddie Krebs spent Sunday with Mr. and Mrs. August Krebs.

Miss Cora and Sidney O'Brien spent Friday Evening with Mr. and Mrs. George Youngs.

Contestants in the popularity contest are asked to abide by the rules of the contest and deposit votes at least once each week. Some contestants have been holding large quantities of votes and not turning them in weekly. This practice makes far too much work for the counters to do in one night, so please hand in votes weekly and make the checking up as easy as possible. The race is close, all ten leaders fighting hard for each position and as yet the prize is far from won. Get into the race girls, collect and sort your votes, bundle them up and hand them in at least once a week.

LOCAL & GENERAL

See US for Work Shirts, Pants and Overalls.—T. E. Scott.

Miss Evelyn Peterson of Vulcan visited Miss Doris Friesen this week.

Mrs. H. C. Clarke of Edmonton visited at the W. Scheidt home last week.

Your Next Pair of Shoes?—We have them. From \$2.00 Up.—T. E. Scott.

Miss Annie Wesley and her friend have returned from an extended trip to Banff and B.C. points.

All contestants in the popularity contest are requested to hand in their votes each week.

Mrs. Dr. McEwen of Nordegg visited Mr. and Mrs. Scheidt and other friends last week.

Mr. Art Reiber motored to Edmonton this week. He is making arrangements to attend the University of Alberta next term.

Mr. Soho Joe was a visitor to the annual Chinese picnic and sports day at St. George's Island, Calgary on Sunday.

The Didsbury U.F.A. Co-operative Association expects to have in a car of mixed fruit at an early date. Watch for further announcement.

Mrs. Eva Hopkins who has been visiting her mother for the past six weeks left by auto for her home at Los Angeles on Monday.

Mrs. N. Weicker, former resident of Didsbury and now of Vancouver, is visiting with relatives and friends in the town and district.

A. G. Studer and Geo. Julien proved themselves real fishermen last weekend. They fished the Big Red and report landing about 30 good trout.

Vic. Harmes of Herbert, Sask., Gordon Weir and Allen McGoram of Swift Current, Sask., visited with their old friend John Goertz this week.

Mr. and Mrs. Frank Kaufman, Miss Lucille Smith and Milt Ford motored to Sylvan Lake on Sunday to attend the regatta. The regatta, however, was postponed.

Rev. and Mrs. J. Geeson who have been holidaying in the Glacier Park will return this weekend and Mr. Geeson will take the services at Westcott at 11 a.m. and Knox United Church at 7:30 p.m. on Sunday. The topic will be "A Distinguishing Mark of a Christian."

Mr. and Mrs. Fred Hyde, who have been visiting their old home at Kincardine, Ont. during the summer, returned home on Tuesday. Fred says that the eyes of the people of Ontario are on Alberta and that he was asked more questions about social credit than he could answer.

Miss Nelda Huget, who is leaving Friday for Kelowna, where she will enter training at Kelowna General Hospital, was guest-of-honor at a handkerchief shower and tea given at the home of Miss Wynne Studer on Monday afternoon. Many of her friends were present to express their good wishes before her departure.

Buy Your Stocking Gloves from Us—T. E. Scott. We have them from 45c Up.

The Calgary Herald reports the death of Robert J. Lougheed, former resident of Didsbury district, who died in Calgary on Friday, at the age of 67. Mr. Lougheed came to Didsbury in 1900 and later moved to Alsask. He returned to Calgary where he had lived since 1922. He is survived by his widow, three sons and two daughters.

Miss Aleda Huget returned from her vacation on Friday. She was one of the party of school teachers from different parts of Alberta who travelled by special motor bus and visited all the principal places on the west coast as far south as Caliente, Mexico. She reported having a wonderful time and said it was not only a novel but a wonderful way to spend a vacation.
